

Kene Ezeoke

Seattle, WA | [LinkedIn](#)

SUMMARY

Joined a NYC startup as employee #13, closed the deals that proved product-market fit, built the team from 1 to 6, and helped attract investment from Marc Benioff.

Since then, 8+ years across Amazon, Apple, Google, and F5 doing the same thing in different contexts: walking into ambiguity, building what doesn't exist, and making the results visible to the people who matter. I work best when the problem isn't fully defined yet. Chicago Booth MBA. Most recently, designing and deploying production ML models (forecasting and NLP classification) solo, with AI as the build team.

EXPERIENCE

Sr Program Manager, Amazon

Jul 2024 to Present

Business performance and executive reporting | Add to Delivery

Seattle, WA

- Built the business performance metrics program from scratch, standardizing reporting on conversion, adoption, customer engagement across 3 orgs and 4 partner teams. Own Page 0 of the bimonthly SVP business review (the opening narrative read by the CEO of Worldwide Amazon Stores).
- Designed and launched a GenAI reporting automation system using RAG architecture, writing the business logic and context engineering framework that enables LLMs to interpret performance data across multiple internal data sources. Built an LLM-as-a-judge evaluation loop that drove AI-generated insights quality from 2.6 to 4.1 (on a 5.0 scale) over 11 weeks. Delivers weekly automated dashboards now used in SVP-level reviews.
- Built and deployed a CatBoost forecasting model for weekly metric analysis and forecasting, enabling the Weekly Business Review process to automatically distinguish normal fluctuations from signals requiring investigation by product teams. Adopted as the standard across two product teams.
- Built the VOC program from scratch, including a custom API tool that cut transcript collection from 4-6 hours to 15 minutes and a hybrid ML classification pipeline (sentence-transformer embeddings + keyword disambiguation) that reduced unclassified contacts from 22% to 9% and powers monthly leadership reporting. Analysis surfaced CX friction patterns, including the duplicate order pattern, that drove product redesigns, contributing to a 1.6% reduction in customer cancellations and 1.2% reduction in return rates. Scaled program to 6 international markets with no added headcount or engineering resources.
- Authored monthly executive business performance narratives, translating customer friction patterns into prioritization recommendations for product teams. Identified payment method friction as a reprioritization, driving an 8 percentage point reduction in related customer complaints.

Senior Program Manager, Business Operations, F5 Networks

Jan 2022 to Nov 2023

Right-hand to Sr Director of Operations | PMO, product launches, process transformation

Seattle, WA

- Redesigned the stage-gate process governing launches across a 100+ person organization spanning Product, Engineering, PMM, Support, Marketing, and SKU Management. Reduced launch cycle time by 20% by eliminating redundant gates, shifting ownership upfront, and building transparency mechanisms that kept supporting teams aligned without blocking delivery. Gained buy-in from Product VPs and the CPO before rolling out across the org.
- Led the top-priority product launch through the new stage-gate process, shipping 50% faster than industry standard and delivering \$45MM in annual revenue (+6% YoY) by driving 6 cross-functional teams through development, launch readiness, and GTM.
- Drove the initial phases of F5's first outsourced hardware manufacturing initiative, owning partner identification, contract negotiation, and cross-functional coordination through v1 software testing with Flextronics and Dell.
- Identified a VP-level problem with beta customer drop-off and a parallel sales team need for a customer pitch around delayed software, and solved both with one program. Redesigned the beta onboarding process to enable self-service, cutting onboarding time from 3-4 weeks to 1 week, and grew participation 10x including 2 new preorder conversions.
- Reduced cycle time for OEM and partner procurement approvals by 50% by streamlining the approvals process and building a repeatable workflow for recurring partner payments.

Channel Partner Operations Manager, Apple

Jun 2021 to Jan 2022

North America channel partner operations

Austin, TX

- Managed \$500MM in North America revenue through operational planning, forecasting, and supply chain risk mitigation across Apple's retailer and distributor network with no inventory delays.

- Built a first-of-its-kind internal backlog analysis tool using SQL and Excel macros to surface perishable order risk invisible in existing reporting, and drove \$10MM+ in order recovery across Apple's retailer and distributor network.

Product Operations Manager (MBA Intern), Google

Subscriber retention and CX team integration

Jun 2020 to Sep 2020

Mountain View, CA

- Identified an existing StratOps churn model and applied it to proactively surface at-risk subscribers, partnering with marketing and support to implement retention plans that drove a 60% increase in subscriber engagement.
- Designed the process and org restructuring recommendations to integrate 3 product CX teams, projecting a 20% increase in cross-selling revenue through shared infrastructure and reduced overhead.

Launch Program Manager, Amazon

International expansion and marketplace partner operations

Aug 2015 to Aug 2019

Seattle, WA

- Delivered 40% YoY revenue growth with 70% of allocated budget across 8 countries in the US, EU, and APAC by shifting from mass content acquisition to a targeted strategy, using BI analysis to identify which Prime Reading titles drove net positive outcomes for both readers and authors.
- Scaled third-party restaurant partner onboarding 8x to support Prime Now expansion into 50+ US cities by developing geographic launch plans, streamlining onboarding processes, and introducing automation.
- Reduced weekly effort by 27% for a 200-person sales team by identifying workflow inefficiencies and leading CRM improvements from concept to launch.

Sales Operations Manager, Silverline (now part of Mphasis)

Founding team member | Employee #13 | New York, NY

Aug 2011 to Aug 2015

- Closed the initial deals that proved product-market fit, directly funding the first PM hire and growing the product into a multi-million dollar business line.
- Built a custom renewal system using account IDs and Stripe payment integration, giving enterprise clients a one-click renewal flow that drove 85%+ renewal rates against a 75% goal.
- Designed and launched two Salesforce Service Cloud customer support portals, including case prioritization logic, assignment flows, and all support documentation. Automated reporting on case resolution cut issue resolution time by 48 hours.
- Optimized Salesforce CRM workflows across the sales team, driving 27% quota overperformance.
- Built and led the team from 1 to 6 people, helping attract investment from Marc Benioff to expand the business further.

TOOLS & EXPERTISE

AI & Automation: NLP / text classification (sentence-transformer embeddings), time series forecasting (Prophet, Chronos 2, CatBoost), RAG, LLM output evaluation and quality scoring, context engineering, prompt engineering, AI-assisted development, workflow automation

Data & Analysis: SQL, Advanced Excel, Tableau, QuickSight, LLM-powered dashboard generation

Program Management: Lean Six Sigma Green Belt, Stage-gate / PDLC governance, LucidChart, Miro, Mural, Smartsheet, Asana, Confluence, SharePoint

CRM & Customer Experience: Salesforce (Sales Cloud, Service Cloud), HubSpot, Qualtrics

EDUCATION

The University of Chicago Booth School of Business

Chicago, IL

Master of Business Administration (MBA)

Concentrations: Operations, Marketing, Strategic Management, Behavioral Science

State University of New York, Stony Brook

Stony Brook, NY

Bachelor of Science, Biology
